- Satellite Engineering

Play-Out Services

SAT Channel provides customers with remote play out services, that enable them to control their tv channel from anywhere, The service helps clients to save on their equipment costs as they don't need to install sophisticated hardware on site.

Playbox is the most common server that Sat Channel uses for its clients. The PC-based architecture enables the PlayBox video server to simultaneously ingest, play and stream analogue, SDI, DVB ASI or IP signals - utilising industry-standard compression formats.

Additionally, PlayBox software architecture design permits targeted configuration and independent scaling of storage, traffic management and dynamic graphics.

Broadcast System Integration

Sat Channel Broadcast Systems & Equipment offers solutions for both new systems installations and upgrades on existing systems, Once you have identified your tv project, we will work with you from consultancy, concept, planning and design, through to installation, commissioning, training and ongoing support. We have handled numerous SD and HD installations for studios, O.B. Vans,Playout Centers and Broadcasting Transmission across the globe.

Whether you are looking for a new installation, or to upgrade your existing system from SD to HD or simply enhance what you have, we can assist you and provide you with most economical and reliable broadcast equipment solutions
